Who We Are

Founded in **2016**, **Samam Al Khair Trading Company** has established itself as a premier specialist in high-performance fuel systems and pumping solutions. We serve as the vital link between global engineering excellence and local industrial requirements, providing integrated systems that ensure the safe, precise, and efficient movement of critical fluids.

While our capabilities span across project supplies and fabrication, our core identity is defined by our mastery of **Fuel Infrastructure**. From high-volume industrial pump skids to automated monitoring systems, we provide the technical backbone for sectors that cannot afford downtime. At **Samam Al Khair**, we combine premium global brands with local technical support to deliver "A to Z" solutions for the modern energy and industrial landscape.

ISO 9001 2015 Certified Company.

Projects

- **Trian Island** - Fuel transfer pumps, tank accessories, and related materials.
- **Amak** - High-capacity pumping systems & specialized tank accessories for remote site infrastructure.
- **NEOM** - Supplied high-capacity fuel transfer skids for heavy machinery.
- **Oxagon** - Fuel transfer pumps, tank accessories, and related materials.
- **Trojina** - Fuel transfer pumps, tank accessories, and related materials.
- **Aramco-Approved Projects (Ras Tanura)** - High-quality Aramco-approved material supply.

Projects In Transit

- **Fuel Transfer Systems** - Ongoing installation and commissioning of fuel transfer systems for various clients.
- **Tank Leak Detection Systems** - Ongoing installation and commissioning of tank leak detection systems for various clients.

Dedicated to providing excellence in service throughout the Kingdom.

Collaborative Partners

What We Provide

Service isn't just a department for us—it's our specialty. We partner with you at every stage, providing the strategic consultation and technical design needed to bring your project to life. Whether it's pre-installation planning or post-installation support, we are committed to delivering results that align with your vision. Our services include:

Fuel Visibility: Total Control in Real-Time

REAL-TIME FUEL TRACKING

Monitor movement and consumption across every site instantly to eliminate delays.

PRECISE AIR-FREE MEASUREMENT

New flow meters include built-in air eliminators for 100% accurate fuel calculations.

INSTANT VARIANCE & LEAK DETECTION

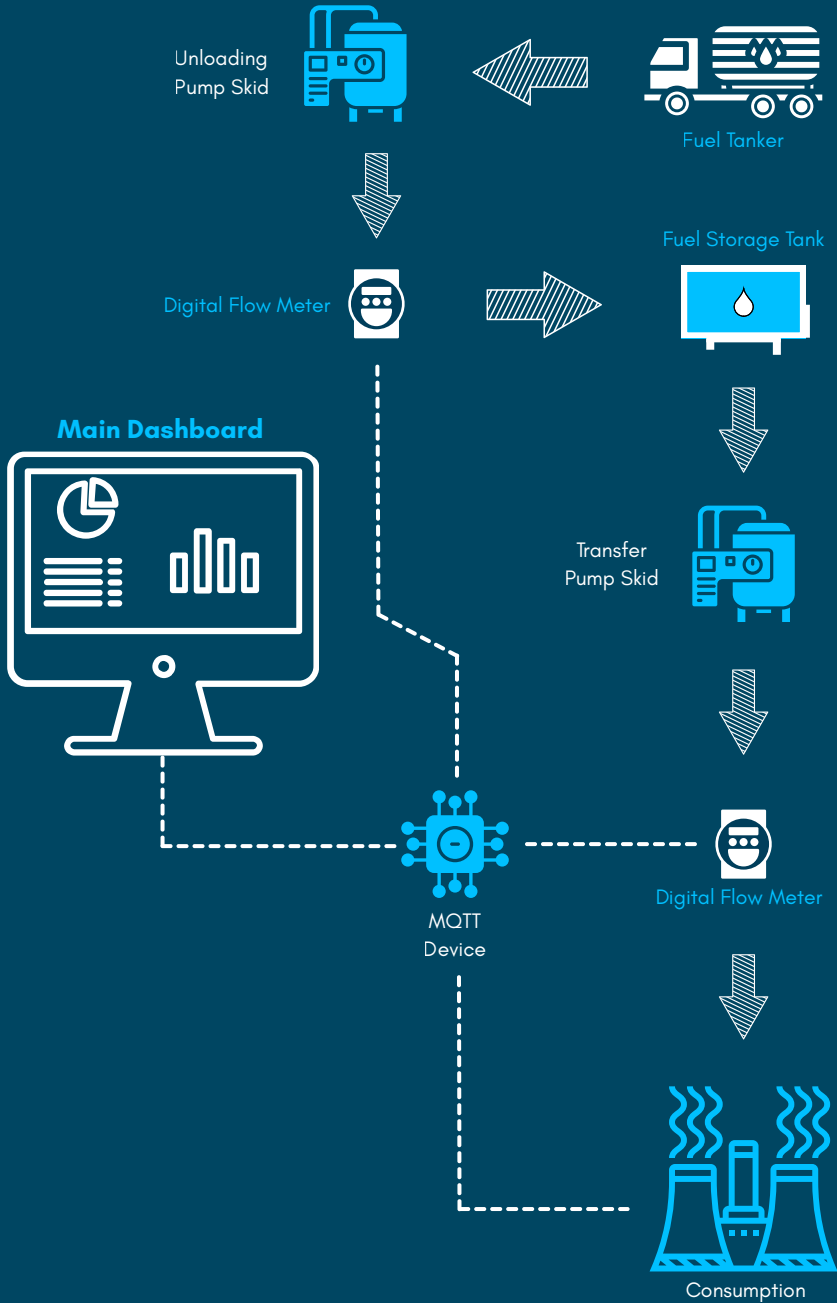

Compare delivery vs. consumption data to quickly identify losses or reporting gaps.

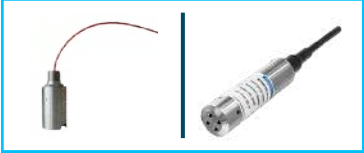

MAXIMIZE SITE AVAILABILITY

Proactive issue management ensures sites remain operational with optimized fuel logistics.
